

Sree Raswanth V S

Software Engineer | Full-Stack Developer

raswanth28@gmail.com | +91 81240 90160 | Chennai, Tamil Nadu, India | sreehz.github.io/shell_portfolio

SUMMARY

Computer Science graduate and full-stack software engineer with professional quality-assurance experience at Amazon Alexa. Proficient in React, Node.js, TypeScript, Python, Java, and SQL, with hands-on experience building full-stack web applications, blockchain-based systems, and data-analytics dashboards. Passionate about data privacy and security — I run a self-hosted technical blog that teaches developers how to protect their data, which continually sharpens my analytical thinking and problem-solving skills.

EXPERIENCE

Amazon — Quality Service Associate - Alexa Tech Support Oct 2025 – May 2026

- Owned end-to-end testing for two major upcoming Alexa features across 50+ device variants, ensuring release quality.
- Recognized on Amazon's Wall of Fame for rapid ramp-up and 100% production execution with zero missed defects.
- Built internal tools and documentation for unbricking devices, reducing recovery time and team friction.
- Attended daily on-call standups with stakeholders and developers for task allocation and feature testing.

INTERNSHIP

Chennai Metro Rail Limited — Data Analytics Intern 45 Days

- Built a real-time passenger-flow analytics dashboard aggregating ticketing data across all metro stations.
- Analyzed and visualized ticket-channel breakdowns (online, WhatsApp, paper, UPI, parking) using Python.
- Stack:** React, Node.js, Express, PostgreSQL, Django, Leaflet, Bootstrap.

PROJECTS

Enhanced IP Trace System Using Blockchain Integrity — React, Node.js, MongoDB, Ethers.js, WebRTC

- Built a blockchain-backed tracing system ensuring data integrity through immutable logs and cryptographic key-based authentication.
- Integrated WebRTC to expose masked IPs and built admin dashboards for real-time suspicious-activity detection.

Terminal Portfolio — TypeScript, Vite, GitHub Actions

- Built a terminal-style portfolio with a custom ~200-line command engine (history, autocomplete); zero dependencies, ~6 kB gzipped.
- Achieved a perfect Lighthouse 100/100/100/100 score with automatic deployment to GitHub Pages via GitHub Actions.

Personal Technical Blog — Next.js, TypeScript, Tailwind CSS, Supabase, Cloudflare Pages

- Self-hosted blog sharing engineering tutorials with the developer community; built with Supabase authentication, Postgres, and storage.

Expense Tracker (Java CLI) — Java, JDBC, MySQL

- Command-line application to add and summarize expenses by date, month, or year, using a layered architecture (POJO + DAO + Service) with JDBC PreparedStatements for SQL safety.

SKILLS

Languages:	TypeScript, JavaScript, Python, Java, C, SQL
Frontend:	React, HTML, CSS, Bootstrap
Backend:	Node.js, Express.js, Django
Databases:	PostgreSQL, MySQL, MongoDB
Tools & DevOps:	Git, GitHub Actions, Vite, JDBC
Concepts:	OOP, Data Structures & Algorithms, System Design, Blockchain, Data Analytics, Software Testing & QA

EDUCATION

Sri Sairam Engineering College, Chennai — B.E. Computer Science & Engineering, CGPA 7.69	2021 – 2025
SRV Boys Hr. Sec. School, Namakkal — Class XII (HSC), 87.07%	2019 – 2021
Holy Cross Matric. Hr. Sec. School, Salem — Class X (SSLC), 80.00%	2007 – 2019

CERTIFICATIONS & AWARDS

Anthropic:	Claude Platform 101, Claude Code 101
Hackathon:	Slash-and-Hack — Third Prize
edX / IBM:	Python for Data Science, AI for Everyone, AI Chatbots Without Programming
Cisco:	Introduction to Packet Tracer, Cybersecurity Essentials
